

Browdwell: 24 designed emails for a luxury skincare brand

Lyuboslav Alexandrov · Email copy and design · Spec project, 2026

Browdwell sells 24k gold facial skincare, an eye cream and an eye roller, to women who have noticed the fine lines, dark circles and puffiness that drugstore products do not touch. The brand had three plain-text cart emails and three branded graphics. This project turned that into four complete flows, 24 designed emails, built to convert on a phone.

What was built. A 7-email abandoned cart flow, a 6-email buyer welcome plus a one-month reorder follow-up, a 7-email general welcome for subscribers who have not bought, and a 3-email browse abandonment flow. Every email was written first, then designed to the brand's own visual language: champagne and gold, all-caps serif headlines, the lowercase wordmark, and a founder voice.

The rules every email follows. The first call to action is visible above the fold on mobile, before the hero image. One takeaway per email, three points at most. Real customer reviews only, six of them, rotated so no two consecutive emails repeat. Prices, codes and guarantees consistent across all 24. Backgrounds flow between sections with no hard colour blocks, and every hero image was art-directed with a clean upper third so the headline never fights the photo.

Eight emails follow in full, two from each flow. The complete set of 24 is in the companion file, Browdwell: All 24 Emails.

This is a spec project built to show the full email programme a DTC skincare brand should be running. The copy, structure, design and image direction are mine. Prices, discount codes, customer counts, press mentions and the founder persona are illustrative and were not verified with the brand. Customer reviews are the brand's own published reviews. Nothing here was sent to a live list.

Abandoned Cart

The seven-email cart recovery. It opens on the saved cart, moves through proof and objections, and only introduces a discount on day four, so the first three emails have to sell on the product alone.

Your Order (Incomplete)

Subject line: Your Order (Incomplete)
Sent: 15 minutes after the cart is abandoned
The job: Reminder plus the reason to come back. Headline, subhead and button sit above the fold on mobile, the saved jar and price sit in a cart strip, and three real reviews close.

A NOTE FROM JENNY

A lot of women who started with the eye cream have added the roller lately, and they are seeing better results, faster.

The cream does the deep work overnight. The cooling roller ball wakes the under-eye up in the morning, moves the puffiness along, and pushes the gold in where it matters.

Together they are the routine I actually use.

General Welcome

Seven emails for the subscriber who has not bought. Founder story first, a question email that reads like a typed note, then education, proof and a subscriber-only offer on day seven.

The truth about aging skin (it's not what you think)

Subject line: The truth about aging skin (it's not what you think)

Sent: Day two

The job: The education email. Why skin ages, why surface creams miss, what 24k gold does in the layer where collagen lives, told in three numbered beats with a macro hero instead of a face.

THE SCIENCE, EXPLAINED THE WAY A FRIEND WOULD

browdwell.

THE TRUTH ABOUT AGING SKIN

It is not what you think, and it is not inevitable. Two minutes, and you will see your face differently.

SEE HOW GOLD WORKS

WHAT'S ACTUALLY HAPPENING

THREE THINGS NOBODY TELLS YOU

1 It is not inevitable

Most women think that once you hit your 40s, firmness goes, the under-eyes look tired and the only option is to cover it up. The signs of aging can be slowed down and, in appearance, reversed.

2 It starts on the inside

As we age, skin produces less and less collagen, the protein that keeps it firm and elastic, the complexion even and the under-eyes smooth. When collagen drops, fine lines deepen and dark circles settle in.

3 So the fix has to go there too

Creams that sit on the surface cannot reach the layer where collagen is made. 24k gold particles penetrate deep into the skin's layers to help promote healthy collagen production, support elasticity and firmness, and improve blood flow for a brighter, more even complexion.

SEE HOW GOLD WORKS

A NOTE FROM JENNY

That is why I created Browdwell. Not another cream to cover the signs of aging, but a luxurious, effective way to work on your skin from the inside of its layers out. It is working, and the women below are the proof.

- Jenny Henderson, Founder

They had tried so many products that promised to help with fine lines, dark circles and dull skin, and nothing seemed to work.

Every one of them is glad she did.
